

ALLARS

Australasian Limb Lengthening and Reconstruction Society

14-15th February
2020

Melbourne
Convention Centre

www.allars.org

In 2020 ALARS presents the definitive program for surgeons and trainees who want to understand the techniques of limb reconstruction.

If you think you know orthopaedics think again. This program incorporates lectures, mini symposia, scientific papers, case discussions and ten workshops. All registrants will have access to the Online Deformity Analysis course and self assessment modules as a primer.

This year course includes

Advanced deformity analysis techniques

Assessment and management of rotational deformity

Biomechanics of external fixation

Osteotomies in the lower limb

Managing the Difficult Patient

Challenging Conditions

New Technologies
