

The Canterbury District Health Board are looking for experienced Orthopaedic Surgeons who have a sub specialty interest in trauma.

Our Orthopaedic Department provides acute and elective services for more than our Canterbury Population. As a tertiary centre, we provide a number of key specialist services across the South Island and the lower half of the North Island.

Our orthopedic service provides over 5000 acute surgeries each year, and this is growing. We have a trauma unit, and one of only two spinal units in NZ - we are number one when it comes to trauma care.

Our Orthopedic Department has a strong and deserved reputation for providing excellent training and research. The members of our Orthopedic Surgical Department work closely together in a collaborative and supportive environment, and function extremely well as a team.

If you are looking for a unique opportunity and are keen to secure a spot in one of the country's most reputable Orthopedic departments, then we are keen to hear from you.

Anyone interested in this exciting position please contact either Jayne Gibson, Service Manager: [Jayne.gibson@cdhb.health.nz](mailto:Jayne.gibson@cdhb.health.nz)

Or Gordon Beadel, Clinical Director: [Gordon.Beadel@cdhb.health.nz](mailto:Gordon.Beadel@cdhb.health.nz) to discuss further.
